

The City of Lacombe will kick off the second annual Christmas Light Exchange program on Monday, October 21, 2013 at City Hall. This program, offered in partnership by The City of Lacombe and Fortis Alberta, will help Lacombe residents save energy and money over the holiday season.

How to participate?

You can participate in the exchange by bringing two strings of inefficient, incandescent, exterior holiday house lights to City Hall where they will receive one box of new, energy efficient LED lights. There is a limit of one box of free LED lights per adult per household. Adults must be present to claim the lights.

Do you know the benefits of replacing incandescent lights with LED lights?

Replacing incandescent house lights with LED lights can reduce your holiday energy consumption by up to 95 percent. For a residence operating 6 strings of old Christmas lights for six hours a day, the monthly energy cost will be approximately \$27. Replacing those old lights with the same number of LEDs will cost only 47 cents for the entire month.

For more information on this program call Guy Lapointe at 403-782-1263.
