DB Bobcat Services

Success Story

With just one truck and a Bobcat (still on display at the current shop), DB Bobcat offered good service at a fair price. Working with another local trucking company, WT Armstrong, for moving the equipment, DB Bobcat offered a service that was high in demand and the business grew year after year.

DB Bobcat has really grown with the community. At their peak they now employ a staff of over 35 and they put a real emphasis on helping to grow the community. "We have come a long way from the small operation we started with 27 years ago," says Edie Beach. "We now have a large and skilled staff which allows for our projects to be completed in much shorter periods. This means that our people can spend their evenings at home which is very important to us."
